Connecting TI-Nspire to a Computer

One function of The TI-Nspire is the ability to connect it to your computer. By doing this you can transfer your calculator display to your computer screen. Also you can add new programs to the calculator. This guide will aid you in doing these things.

- Download the software to allow you to connect your calculator to your computer from the Texas Instrument Website: http://education.ti.com/calculators/down...

Step 2

- Make sure you have a TI USB cable to connect your calculator and computer
- The ends of the cable should look like those in this picture

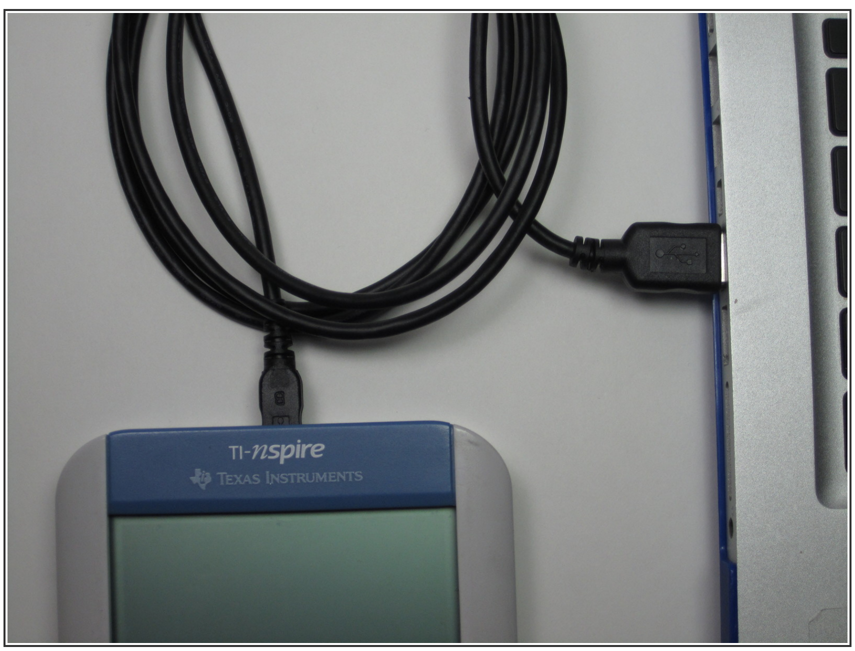

Step 3

- Insert the plug into the the slot at the top of the calculator.

Step 4

- Connect the calculator to the computer through the USB port
- Through the TI connect program you are ready to perform actions such as viewing your calculator display on your computer screen
